

CCP COATINGS TO EXHIBIT AT NEW ACS SHOW JUNE 3-5

Put the Big Blue Booth (#1810) at the top of your list when you tour the exhibits in Charlotte, North Carolina, June 3-5.

CCP, America's premier resin company and leading manufacturer of resins for architectural and industrial coatings, will be there, proudly introducing SYNAQUA™ water-borne alkyds to the U.S. market.

Find out all about—

SYNAQUA™ AD 821-2241, acrylic modified alkyd dispersion designed for low VOC air dry architectural applications on wood and concrete.

Applications for SYNAQUA™ AD 821-2241 include: porch and deck stains, wiping stains, sash and trim enamels, modifier for acrylic emulsions in ultra low voc applications.

SYNAQUA™ AD 821-2220, a rapid dry self crosslinking acrylic modified alkyd dispersion designed for low VOC architectural and industrial applications, with hard, durable and chemical resistant films.

Applications for SYNAQUA™ AD 821-2220 include: porch and deck stains, water proofers for wood, industrial primers topcoats.

SYNAQUA™ AE 824-2080, a pure short oil alkyd emulsion with "0" VOC potential, designed for high gloss horizontal and vertical architectural applications, also functions as a coalescing agent for acrylic emulsions in low VOC applications. Applications for SYNAQUA™ AE 824-2080 include: interior architectural enamels, sash and trim enamels, flat wall enamels.

And there's more. We'll have facts and figures for you about our full line of coatings resins products—acrylics, additives, alkyds, emulsions, dispersions, epoxies, polyesters, varnishes, and powder. Exhibit hours are: Tuesday and Wednesday, 9 a.m. to 5 p.m., and Thursday, 9 a.m. to 3 p.m. For registration information, go to <http://www.american-coatings-show.com/registration/>
